

**Dieter Uckelmann** studied Mechanical Engineering at TU Braunschweig and received his PhD at the University of Bremen in the Faculty of Production Engineering, PhD topic: Quantifying the Value of RFID and the EPCglobal Architecture Framework in Logistics.

He worked at the University of Cambridge (UK, 2009) and the University of Parma (Italy, 2016) as a guest researcher. Since 2017 he is a visiting professor at the University of Parma, where he supervises two PhD candidates. The focus of his research work is in the field of logistics, radio-frequency identification (RFID), real-time locating systems (RTLS) and the Internet of Things as well as the value of information. Between 2005 and 2012 he has established and managed the LogDynamics Lab at the University of Bremen. Furthermore he is co-editor of the "International Journal of RF-Technologies: Research and Applications". Prior to his academic career, he has been working in management positions for several IT companies.
