16:00. End of the event.

¹ European Cyber Security Organisation (ECSO) initiated the European Cybersecurity STARtup Award with the aim to continue strengthening cybersecurity investment activities in Europe and recognise the next European champions in cybersecurity. The Award is built around a shared belief that European cybersecurity companies delivering ground-breaking cybersecurity solutions need recognition and investment support to be able to scale up and develop their business in Europe. The Award leverages ECSO Cyber Investors Days, a well-established cybersecurity business matchmaking event, and similar events organised by ECSO's partner organisations to create an initiative recognising the most promising European cybersecurity startups and SMEs.
